#### **INSTANT VOLUME AND LENGTH QUICK MAKE-OVER**

STEP 1
Begin by creating a horizontal part across the back of the head, near the nape, where you wish to start the din extensions

STEP 2
Measure the correct size weft you wish to use. Then hold the extension with the snap-clip facing towards you. Snap the clip open by applying outward pressure on the clip ends.

STEP 3
Starting from one side of the head, clip in the end dlip just below the part line to ensure security. Then repeat this step for the entire row until you hav reached the other side of the head.

STEP 4
Release your remaining natural hair that you have pulled out of the way and repeat the parting process 2-3 inches above the first part.

STEP 5
Repeat steps 2-4 upwards unt
you have just enough of your
natural hair to cover the top
row of clip weave extensions
you clipped into your hair

STEP 6
Using the remaining 1.5 inch
wefts extensions, fill in the areas
you wish to add more length or
volume to, in order to create
your desired style
